**This an offline course with the option of a single day hands-on course in mumbai (Batch 135) on Tooth Supported FMRs, is one of the most unique training ever; one that follows a 'tell-show-do-get it done on yourself' approach.**

**With didactic lectures, patient videos, and a unique hands-on experience, this certificate course is sure to eliminate your fears and instill in you the skill and confidence needed for treating reconstruction cases on your own.**

**Over 2500 doctors have successfully completed the program since its inception in 2013, and have had a life changing experience.**

**The question now is, are you ready to walk the journey?**

## **REVIEWS**

Dr. Moez made such a vast and crucial topic of FMR easy to understand in a fantastic manner. The way he shares his in-depth knowledge makes him a really special teacher. Hats off to him.

- Dr Ashwini Shinde

Enjoyed the FMR course thoroughly and would recommend it to all dentists who want to make a difference in their patient's life. Personally, I loved the course content and have no words to explain the passion and hard work put in by the team.

- Dr Sofiya Samad

### LECTURES

- Case selection for FMR
- Introduction and steps involved in reconstruction
- Understanding the collapsed bite and its causes
- Clencher vs Bruxer- differences and management
- Importance of semi-adjustable articulator for FMR cases
- How to choose a semi-adjustable articulator
- How to program the articulator and make its use simple and effective
- How to determine cuspal anatomy and avoid porcelain fracture and food lodgement
- Role of condylar guidance and anterior guidance in FMR cases
- Ideal occlusion in restoration of broken down dentitions for Class I, II & III malocclusions
- The concept of 'Mountography' and the art of convincing patients
- Use of facebow in smile design and reconstruction cases

### VIDEO DEMONSTRATION

- How to record facebow
- How to transfer facebow to semi-adjustable articulator

### LECTURES

- Role of centric relation in bite reconstructions
- Art of deprogramming the mandible using bimanual manipulation and anterior stop appliances
- Protocol for recording the correct CR position using bite registration wax
- Importance of protrusive record
- How to program the semi-adjustable articulator
- Understanding the fallacy of 'collapsed bite' and 'raising the vertical'
- The concept of 'Re-establishing the lost VD'
- How to finalise the VDO in reconstruction cases
- When to open the bite and by how much

### VIDEO DEMONSTRATION

- Customisation of an anterior stop appliance
- Recording the CR using bite registration wax
- Recording the protrusive bite
- Customisation the articulator (zeroing)
- Establishing the final VDO on a semi-adjustable articulator

### HANDS-ON (FOR REGISTERED PARTICIPANTS ONLY)

- Customisation of Unwind MD using bite registration paste

### LECTURES

- Material options in FMR
- Treatment options for FMR in distal extension cases
- Interceptive protocols in potential FMR cases
- Role of interdisciplinary treatment in complex cases
- FMR cases in full protocol using PFM restorations
- FMR cases in full protocol using Zirconia restorations
- FMR cases in full protocol using digital concepts
- FMR cases in full protocol using table top concepts and e.max partial prostheses
- FMR cases in full protocol using composite restorations
- DAHL technique for segmental wear
- Concept of long centric and its importance
- Post treatment instructions and follow-up care
- Marketing of FMR cases
- Poor man's FMR, for those who cannot afford treatment

### VIDEO DEMONSTRATION

- Step-by-step protocol for FMR of patients with Bruxism and severe tooth loss using analog and digital protocols.

### LECTURE AND VIDEO DEMONSTRATION

- The art of Occlusal Equilibration- Additive (using canine build-up) and reductive protocols (enameloplasty).

### HANDS-ON

- Recording of Facebow using Corident system,
- Transferring Facebow onto Semi-adjustable Articulator,
- Customisation of Anterior Deprogrammer (Unwind MD),
- Recording Centric Relation using bite wax (BiteAI)
- Assembling the Articulator and understanding each part of the assembly,
- Programming the Semi-adjustable Articulator,
- Fabrication of Putty Index,
- Test Drive for the Full Arch using Bis-Acryl temporary material (Protemp 4)

# AMAZING

Each participant will be given individual facebows and semi-adjustable articulators to work with (no sharing)

All materials for hands-on shall be provided at the venue

## PARTICIPANTS SHALL RECEIVE:

1. Breakfast, Lunch, and Hi-Tea on all days,
2. Framed certificate of completion from 'MIKEDUCATION',
3. Hard Copy Notes- Full Color,
4. Personalized Pens and Bags,
5. Articulating Paper Samplers- 8 different thicknesses,
6. PDFs of important clinical procedures, namely:
  - 20 steps in Facebow record and transfer, <sup>+91,98209,48885</sup>
  - 8 Steps for Customising Unwind MD,
  - 22 Steps in Recording the Centric Bite,
  - 6 Steps for Protrusive Record and Setting H Value,
  - 3 Steps for Determining the VDO on the Articulator,
  - Steps in FMR: 12 Appointment Formula
7. Unwind MD by MIK Dental (Anterior Deprogrammer for hands-on participants),
8. Prinout of Materials needed for FMR,
9. Special offer on Semi-Adjustable Articulator and Facebow,
10. Promo code for subscription on [www.mikeducation.com](http://www.mikeducation.com)
